Abstract	vi
List of Content	vii
List of Table	xii List
of Figure	xiii
List of Abbreviation and Symbols	xiv

Chapter One

1. Introduction	1
1.2 Rational	5
1.3 Objectives	

Chapter Two

2. Review of Literature	6
2.1. Types of Leukemia	
2.1.1. Acute lymphoblastic leukemia (ALL)	
2.1.2. Acute myeloid leukemia (AML)	
2.1.3. Chronic lymphoblastic leukemia (CLL)	7
2.1.4 .Chronic myeloid leukemia (CML)	
2.2. Risk factors of childhood leukemia	8
2.2.1 Genetic risk factor	
2.2.1.1Genetic Abnormalities Common to a Wide Range of Leukemias	

2.2.3. Ionizing radiation	9
2.2.4. Electric and magnetic fields (EMF)	
2.2.5. Chemical exposure	10
2.2.5.1. Air pollution	
2.2.5.2 Parental smoking	
2.2.5.3 Pesticides	
2.2.5.4. Prescription drugs (pre-natal exposure)	
2.2.5.5. Parental alcohol consumption	
2.2.5.6. DNA topoisomerase inhibitors	11
2.2.6. Diet:	
2.2.7. Infectious exposure	
2.2.8. Other factors associated with childhood leukemia	
2.2.8.1 Maternal age >35years	
2.2.8.2 Miscarriage history	12
2.2.8.3. Socioeconomic status	
2.3. Viruses and cancers	
2.4. Epstein - Barr virus	
2.4.1 Molecular biology of Epstein - Barr virus	13
2.4.2 Strains of Epstein - Barr virus	
2.4.3. EBV Latent Proteins	14
2.4.3.1 EBNA1	
2.4.3.2 EBNA2	
2.4.3.3. EBNA3A, EBNA3B, EBNA3C	15

2.4.3.4. EBNA-LP	
2.4.4. Latent Membrane Proteins (LMPs)	
2.4.4.1 LMP1	
2.4.4.2. LMP2	16
2.4.5. EBERs	
2.4.6. The natural history of EBV infection	17
2.4.7. Pathogenesis of EBV	18
2.4.8. Immunity of EBV	
2.4.9. Oncogenic features of EBV	19
2.4.10. EBV and Cancers	20
2.5. Diagnosis of leukemia in childhood	21
2.5.1. Blood cell counts and blood cell examination	
2.5.2. Bone marrow aspiration and biopsy	
2.5.3. Other blood tests	22
2.5.4. Lymph node biopsy	
2.5.5. Lumbar puncture (spinal tap)	23
2.5.6. Cytochemistry	
2.5.7. Flow cytometry	
2.5.8. Immunocytochemistry	24
2.5.9. Immunophenotyping	
2.5.10. Cytogenetics	
2.5.11. Molecular genetic studies	
2.5.12. Imaging Studies	25

2.5.12.1. X-rays	
2.5.12.2. Ultrasound	26
2.5.12.3. Computed Tomography (CT scan)	
2.5.12.4. Magnetic Resonance Imaging (MRI)	

Chapter Three

3. Materials and Methods	27
3.1. Study design	
3.2. Study Area	
3.3. Study Population	
3.4. Sample size	
3.5. Sample collection	
3.6. DNA Extraction From blood	28
3.7. EBV Primer	
3.8. Molecular Identification (PCR)	29
3.9. Gel electrophoresis	
3.10. Statistical analysis	
3.11. Chi Square Test	

Chapter Four

4. Results	30
------------	----

Chapter Five

5. Discussion	45
---------------	----

Chapter Six

6. Conclusion and recommendations	48
-----------------------------------	----

Chapter Seven

7. References	49
---------------	----

List of Tables

Table	Title	Page
1	Distribution of the study subjects by age.	32
2	Distribution of cases and controls by age.	33
3	Showing the relationship between the EBV and gender.	34
4	Showing the relation between types of leukemia and the presence of EBV.	35
5	Showing the relationship between the residents and presence of EBV.	36
6	Showing the presence of EBV by age group	37
7	Showing the relationship between the residents and presence of EBV.	38
8	Showing the relation between the type of leukemia and the resident.	39

List of Figures

Figure	Title	Page
1	Linear map of the EB virus genome.	16
2	Showing the relationship between the EBV and gender.	39
3	Showing the relation between types of leukemia and the presence of EBV.	40
4	Showing the relationship between the residents and presence of EBV.	41
5	Showing the presence of EBV by age group.	42
6	Amplification of Epstein - Barr virus by EBV latent membrane protein-1.	43
