Chapter1		
Introduction		
1.1	Alkaloids	1
1.2	Historical background	1
1.3	General properties of the alkaloids	3
1.4	Natural occurrence	3
1.5	The nitrogen of alkaloids	5
1.6	Site of formation of alkaloids	5
1.7	Function of alkaloids in the plant	5
1.8	Distribution of alkaloids in the plant	6
1.9	Nomenclature of alkaloids	8
1.10	Classification of alkaloids	9
1.10.1	Phenyl ethylamine group	10
1.10.2	Pyrolidine group	11
1.10.3	Pyridine group	12
1.10.4	Pyrolidine-Pyridine group	15
1.10.5	Quinoline group	16
1.10.6	Isoquinoline group	18
1.10.7	Phenanthrene group	19
1.10.8	Alkaloids of the indole group	20
1.10.9	Alkaloids of the imadizole group	20
1.10.10	Alkaloids of the Purine group	21
1.10.11	Steroidal alkaloids	21
1.10.12	Alkaloids of the carboline group	21
1.10.13	Alkaloids of the tropolone group	22
1.10.14	The furoquinoline group	22
1.10.15	Monocyclic alkaloids	24

1.10.16	Bicyclic alkaloids	25
1.10.17	Polycyclic alkaloids	27
1.11	Alkaloid biosynthesis	30
1.11.1	Biosynthesis of tropane alkaloids	31
1.11.2	Biosynthesis of pyrrolidine-pyridine alkaloids	31
1.11.3	Biosynthesis of quinolone alkaloids	32
1.11.4	Biosynthesis of isoquinoline alkaloids	33
1.11.5	Biosynthesis of indole alkaloids	34
1.11.6	Biosynthesis of steroidal alkaloids	34
1.12	Flowering plant	35
1.13	Uses of medicinal plants	36
1.14	Alhazza (<i>Haplophyllum tuberculatum</i> forsk A.Juss.)	36
1.15	Rutaceae	38
1.16	Taxonomy of the genus <i>Haplophyllum</i> A.Juss	38
1.17	Taxonomy of <i>Haplophyllum</i> <i>Tuberculatum</i> (forsk) A.Juss.	39
1.18	Distribution of <i>Haplophyllum tuberculatum</i>	39
1.19	Ethanopharmacology of <i>Haplophyllum</i> <i>tuberculatum</i>	40
1.20	Previous phytochemical investigation of <i>Haplophyllum tuberculatum</i>	40
1.21	Aim of the study	50

Chapter2

Experimental

2.1	Chemicals used	51
2.2	Solvents used	51
2.3	Instruments and apparatus	51
2.4	Other apparatus used	51
2.5	Chromatographic materials	52
2.6	Spray reagents	52

2.7	Collection of the plant material	52
2.8	Documentation of the plant materials	52
2.9	Preparation of the plant materials	53
2.10	Preparation of test reagent for phytochemical investigation	53
2.10.1	Alkaloids test reagent	53
2.10.2	Flavonoid test reagent	54
2.11	Preparation of the plant material for phytochemical investigation	54
2.12	Phytochemical investigation	54
2.13	Test for alkaloids	54
2.14	Test for flavonoids	54
2.15	Test for tannins	55
2.16	Test for glycosides	55
2.17	Method of extraction of the plant material	55
2.18	Method of thin layer chromatography	56
2.19	Melting point determination	57
2.20	Physico-chemical methods	57
2.21	Anti-microbial activity of <i>H.tuberculatum</i>	57
2.22	Method of anti-bacterial activity	58
2.23	Preparation of fungal suspension	58
2.24	Method of anti-fungal activity	58
2.25	Simple chemical tests for the non alkaloidal constituents compound 3 and compound 4	59

Chapter 3

Results and discussion

3.1	Results	61
3.1.1	Preliminary phytochemical screening	61
3.1.2	Further investigation	61
3.1.3	Mayer's reagent test	61
3.1.4	Dragendorff's reagent test	62

3.1.5	TLC for the concentrated chloroform extract	62
3.1.6	Result of spraying with Dragendorff's reagent	63
3.1.7	Melting point results	64
3.1.8	Spectroscopic results	64
3.1.8.1	Compound1	64
3.1.8.1.1	The UV result of compound1	64
3.1.8.1.2	The IR result of compound1	67
3.1.8.1.3	The ¹ HNMR result of compound1	68
3.1.8.1.4	The mass spectrum result of compound1	70
3.1.8.2	Compound2	71
3.1.8.2.1	The UV result of compound2	72
3.1.8.2.2	The IR result of compound2	74
3.1.8.2.3	The ¹ HNMR result of compound2	76
3.1.8.2.4	The mass spectrum results of compound2	78
3.1.8.3	Compound3	80
3.1.8.3.1	The UV result of compound3	80
3.1.8.3.2	The IR result of compound3	80
3.1.8.4	Compound4	88
3.1.8.4.1	The UV result of compound4	83
3.1.8.4.2	The IR result of compound4	83
3.1.9	Result of anti-microbial activity of H.tuberculum	86
3.1.10	Result of the simple chemical tests of compound3 and compound4	88
3.2	Discussion of the result	89
3.2.1	Characterization of compound1	92
3.2.2	Characterization of compound2	92
3.2.3	Characterization of the non alkaloidal compound3 and compound4	95
	Conclusion &Recommendation	96
	References	97
