

Table of Contents

Subject	Page
Verse	I
Dedication	Ii
Acknowledgment	Iii
English Abstract	Iv
Arabic Abstract	Vi
Chapter One : Introduction and Objectives	
1.1Introduction1	1
1.2Rationale	3
3.Objectives	4
Chapter Two: Literature Review	
2.1Historiocal background	5
2.2. The genus Mycobacterium	6
2.2.1. Taxonomy	6
2.2.2. Classification	6
2.2.3 Morphology and structure	7
2.3 Mycobacterium tuberculosis complex	8
2.3.1 The Cell wall	8
2.3.2. General characters	9
2.3.2.1. Nutritional and environmental requirements for growth	9
2.3.3.2. Resistance to physical and chemical challenges	10
2.3.4. Natural habitat	11
2.3.5 Tuberculosis	11
2.3.5.1. Pathogenesis	11
2.3.5.1.1. Virulence Mechanisms	11
2.3.5.2. Tuberculosis (the disease)	11
2.3.5.2.1 Primary Tuberculosis	12
2.3.5.2.2 Secondary Reactivation Tuberculosis	12
2.3.5.3 Reservoirs and Mode of Transmission	13
2.3.5.4 Pathogenicity of Mycobacteria	13
2.3.5.5 Clinical featuers	13
2.3.5.5.1 Pulmonary Disease	13
2.3.5.5.2 Tuberculosis Meningitis	14
2.3.5.5.3 Lymph Node Tuberculosis	14
2.3.5.5.4 Bone and Joint Tuberculosis	14
2.3.5.5.5Gastrointestinal Disease	15
2.3.5.5.6 Cutaneous Tuberculosis	15
2.3.5.5.7 Renal tuberculosis	16

2.3.5.6 Epidemiology	16
2.3.5.7 Laboratory diagnosis	17
2.3.5.7.1 Conventional Methods for Identifying MTB	17
1.3.5.7.1.1 Microscopic Techniques	17
2.3.5.7.1.2 Traditional Culture Techniques	17
2.3.5.7.1.3. Biochemical Tests and Morphological	18
Features	
2.3.5.7.2. Molecular Methods for Identifying MTB	18
2.3.5.7.3. Susceptibility Tests for MTB	19
2.3.5.8 Treatment	20
2.3.5.9 Multidrug resistant mycobacterium tuberculosis	20
2.3.5.9.1 Epidemiology of Multidrug-Resistant TB	21
2.3.5.10. Molecular Basis Of Drug Resistance	23
2.3.5.10.1. Rifampicin and other rifamycins	23
2.3.5.10.2 Isoniazid (INH)	24
2.3.5.11 Management of Drug-Resistant Tuberculosis	25
Chapter Three: Materials and methods	
3.1 Study Design	27
3.2 Asepsis and sterilization	27
3.3 Sample collection	28
3.4 Ziehl -Neelsen stain	28
3.5 Decontamination of Sputum	28
3.6 Preparation of Lowenstein Jensen medium	29
3.7 Culture Method	29
3.8 Identification of the isolates	30
3.9. Biochemical Tests	30
3.10. Drug Susceptibility Testing	31
3.11. Molecular Identification (PCR)	30
Chapter Four: Results	
4. Results	35
Chapter Five : Discussion	
5. Discussion	49
Chapter Six: Conclusion& Recommendations	
6.1 Conclusions	52
6.2 Recommendations	53
References	54
Appendices	59

List of figures

- Fig.1. Showing acid fast bacilli using ZN stain 36
- Fig.2 characteristic growth of *M. tuberculosis* on LJ medium 37
- Fig.3 Showing results of Catalase test 39
- Fig.4 Showing results of nitrate reduction test 40
- Fig.5 The amplicon of MTC after first run of PCR 42
- Fig.6 The amplicon of MTC after first run of PCR 43
- Fig.7 The amplicon of Rifampicin 45
- Fig.8 The amplicon of Rifampicin 46
- Fig.9 The amplicon of Isoniazid of PCR 47

List of Tables

Table 1. Growth Rate	35
Table 2. Biochemical Tests	38
Table 3. susceptibility by LJ proportion method	44
Table 4. Drugs susceptibility by PCR	41
