

Appendix

Material and instruments:

Material and instruments used for collection of the specimens include:

- Glass slides (75x 25x 0.2mm)
- Disposable gloves
- Plastic coplin jar capacity of 8 slides
- Absolute ethyl alcohol
- Distilled water
- Disposable urine containers

Materials and instruments used for processing of the specimens include:

- Harris' haematoxylin components:
- (Haematoxylin- Potassium alum- Mercuric oxide- Glacial Acetic Acid)
- Orange G6 components:
- (Phosphotungestic acid- Orange G)
- EA50(Light green SF-Eosin Y)
- Concentrated Hydrochloric Acid
- Alkaline tap water
- Xylene
- DPX mounting media
- Cover glass (22x 50mm)
- Strong ammonia
- Centrifuge tubes
