

## **Table of Content**

<b>Content</b>	<b>Page</b>
Dedication	i
Acknowledgement	ii
Abstract	iii
(Arabic)Abstract	iv
 <b>Chapter (1)</b>	
Introduction	1
 <b>Chapter (2)</b>	
<b>literature review</b>	
2-1 Biosynthesis of milk	4
2-2 cytology of the mammary secretory cell	6
2-3 Hormones affecting mammary Function	7
2-4 Biosynthesis of oxytocin	8
2-4-1 Release of Hypothalamic oxytocin	11
2-4-2 Factors affecting oxytocin release	14
2-4-3 Determination of hormone	16
2-4-4 Usage of oxytocin	17
2-4-5 Physiological effect of oxytocin	18
 <b>Chapter (3)</b>	
<b>Procedure used in detecting the role of oxytocin in mammary gland development and their result</b>	
3-1 Oxytocin and milk removal requires for post partum mammary development	24
3-2 Oxytocin release during pre stimulation and milking and its significance for milk removal in dairy cows.	25
3.3 Oxytocin release and milk ejection parameters during milking	26
3-4 Blood velocities to the Female breast during lactation	26
3.5 Oxytocin secretion and milk ejection in human	27
3-6 change in sensitivity of mammary parenchyma to oxytocin	28
3-7 Oxytocin and milk let down in Camel	28

3-8	parturition and mother hood without oxytocin	29
3-9	Oxytocin and mammary blood flow during estrous	29
3-10	Intra mammary pressure response to oxytocin	30
3-11	Chronic oxytocin treatment cause reduced milk ejection	31
3-12	Role of the supraoptic nucleus in regulation of parturition and milk ejection	33
3.13	Oxytocin and milk removal: two important sources of variation in milk production	34
3-14	Integrity of the secretory epithelium of the lactating mouse mammary gland	34
3-15	Effect of short –term exogenous oxytocin treatment on milk yield	35

<b>Chapter (4)</b>	<b>Discussion</b>	36
--------------------	-------------------	----

<b>Chapter (5)</b>	<b>Conclusion and Recommendation</b>	39 -40
--------------------	--------------------------------------	--------

### ***List of Figures***

<b>Figure (1)</b>	<b>Page</b>
