

ABBREVIATIONS

CL.....	cutaneous lieshmaniasis
DCL.....	Diffuse cutaneous lieshmaniasis
GB.....	Gall Bladder
LD.....	lieshmania Donovan
MHZ.....	Mega Hertz
MCL.....	Mucocutaneous lieshmaniasis
PV.....	Portal Vein
SMA.....	Superior Mesenteric Vein
US.....	UltraSound
VL.....	Visceral lieshmania
WHO.....	World Health Organization

LIST OF FIGURES

Figure 2.1 anatomy of liver.....	4
Figure 2.2 sonographic appearance of normal liver.....	5
Figure 2.3 ultrasound image demonstrating a normal size of spleen.....	7
Figure 2.4 ultrasound image of pancreas and surrounding structures.....	8
Figure 2.5 life cycle of lieshmania.....	10
Figure 4.1 age group bar chart.....	15
Figure 4.2 patient regional distributions bar chart.....	16
Figure 4.3 spleen foci bar chart	17
Figure 4.4. Splenic echogenicity bar chart.....	18
Figure 4.5 liver echogenicity bar chart.....	19
Figure 4.6 liver size bar chart.....	20
Figure 4.7 portal vein size bar chart.....	21
Figure 4.8 GB wall bar chart.....	22

Figure 4.9 spleen size bar chart.....23

Figure 4.10 pancreas echogenicity bar chart.....24

Figure 4.11 presence of ascites bar chart.....25

Figure 4.12 relations between GB wall and presence of ascites bar chart.....27

LIST OF TABLES

Table 4.1 age groups and their frequency15

Table 4.2: gender frequency and percentage.....16

Table 4.3 splenic foci percentage and frequency17

Table 4.4 splenic echogenicity frequency and percentage.....18

Table 4.5 liver echogenicity frequency and percentage19

Table 4.6 liver size frequency and percentage20

Table 4.7 portal vein size	21
Table 4.8 gall bladder wall size.....	22
Table 4.9 spleen size	23
Table 4.10 pancreas echogenicity.....	24
Table 4.11 presence of ascites frequency and percentage.....	25
Table 4.12 relationship between GB wall and presence of ascites.....	26
Table 4.13 Chi-Square Tests.....	26
Table 4.14 Summary of ultrasound findings in patients with v leishmania.....	26
