

Questionnaire Based Study

Hyperuricaemia (Gout) in Diabetic Patients Attending

Port Sudan Teaching Hospitals

Gender:

Name:

Age:

Sex: Female Male

Known diabetic: Yes No

Duration of D.M:

< 10 years

> 10 years

Treatment of D.M:

Diet:

Proteins (Meat)

Other food material

Insulin:

Soluble

Zinc

Mixed

Oral

Therapy

Sulphonyl ureas

Biguanide

Combined

Control of D.M:**Symptoms:**

- Poly urea	Yes	No
-------------	-----	----

- Thirst	Yes	No
----------	-----	----

- Weight loss	Yes	No
---------------	-----	----

Other symptoms:

- Joint pain	Yes	No
--------------	-----	----

- Swelling	Yes	No
------------	-----	----

Follow-up:

- Regular	Yes	No
-----------	-----	----

- Irregular	Yes	No
-------------	-----	----

Past History Disease:

- Renal disease	Yes	No
-----------------	-----	----

- Hypertension	Yes	No
----------------	-----	----

Drugs History:

- Diuretic thizide	Yes	No
--------------------	-----	----

Investigations:

Serum uric acid

Blood glucose
