

## List of Figures

<b>Number of figure</b>	<b>Name of figure</b>	<b>Number of page</b>
2-1	showing relay operation	15
2-2	showing the electromagnetic distance protection	16
2-3	showing areas protection	16
2-4	showing delay time for distance relay.	17
2-5	The principle of the differential protection in case a fault happens outside the protected area.	18
2-6	the principle of the differential protection in case a fault Happens inside the protected area.	18
3-1	plain impedance characteristics	23
3-2	Shows the time characteristics of high speed impedance relay	24
3-3	Shows the ideal characteristics level for distance relay of reactance type relay	24
3-4	Shows the characteristics of Mho distance relay	25
3-5	Busbar zone back-up using an offset mho characteristics	26
4-1	Circuit board static relay	30
4-2	Selection of static relays	32
4-3	Space requirement of different relay technologies for same functionality	34
5-1	Distance relay that works on the principle of voltage comparator	50
5-2	Shown line parameters can be adjusted in polar or rectangular mode	72
