

List of Tables

Tables	Page No.
4.1 Comparison between electrical power system protective relays	17
4.2 Phase currents and voltages at relaying point for 3-phase and double –phase faults	27
6.1 Electrical overhead lines data (Rabak-Elobeid) per total line length in secondary values	50
6.2 Electrical overhead lines data (Rabak – Elobeid) per total line length in secondary values	51
6.3 the Lines Impedances and Source data per total line length in Secondary values	52
6.4 Zone1 reach setting	54
6.5 Zone2 reach setting	55
6.6 Zone3 reach setting	56
6.7 minimum load impedance and resistance setting	57
6.8 Load encroachment check for phase-to-phase zones	58
6.9 Power-swing detection setting	60
6.10 Phase Selection Settings	62
6.11 Setting for the general fault criteria (GFC) function block	63
