بسم الله الرحمن الرحيم

قال تعالى:

(نَرْفَعُ دَرَجَاتٍ مَّن نَّشَاءُ وَفَوْقَ كُلِّ ذِي )  
عِلْمٍ عَلِيمٌ

{سورة: يوسف - الايه 76}

## Dedication

I would like to dedicate this study for everyone knows how its importance in my life.

# Abstract

Education services are the key of development in rural communicates. In Sudan primary education is compulsory, it suffers from many problems like other developed countries these problems are: inadequate budgets, lack of schools and teaching staff, low income of family, high illiteracy rates.....etc. Optimum use of existing resources is the key of solution of the above problems.

In this study many criteria had been designed to study the location and capacity of schools, teacher's number and population at one region. Beneficiaries from high potential for geographic information systems. Geographic information systems (GIS) had been used to develop criteria model to support decision making.

The study depend on the descriptive analytical method for analysis of data collected,

The study had shown the distribution of schools is improper to serve the population and bad distribution of teachers, although number of teacher exceeds from the required number.

## المستخلص

الخدمات التعليمية تعتبر مفتاح التنمية في المجتمعات الريفية، في السودان التعليم الابتدائي الزامي للمواطنين غير انه يعاني من بعض المشاكل حاله حال الدول الناميه، ومثال لهذ المشاكل النقص في الميزانيات، قلة المدارس والمعلمين، محدوديه دخل الاسره وارتفاع نسبه الاميه..... الخ. الاستخدام الافضل للموارد يمكن ان يكون مفتاح الحل لمثل هذه المشاكل

في هذه الدراسه تم تصميم بعض المعايير لدراسه مواقع وسعه المدارس، عدد المعلمين، سكان الحي الواحد. مستفيدين من الامكانيات العاليه للنظم المعلومات الجغرافيه (GIS). بحيث تم استخدامه لعمل نموذج يدعم عمليه اتخاذ القرار.

واعتمدت الدراسه في منهجها على الاسلوب الوصفى التحليلي في اطار تحليل البيانات التي تم جمعها.

واظهرت الدراسه ان توزيع المدارس غير ملائم لخدمه سكان المنطقه، كما اوضحت ايضا سوء توزيع المعلمين على الرغم من ظهور زياده في عددهم عن العدد المطلوب.

## Acknowledgment

There are many people I would like to acknowledge that contributed to the Success of this study and the completion of my Master's degree. First, I would like to thank my parents for the love and support they have provided throughout my entire life. I hope I make you proud .Second, I would like to thank my Supervisor Dr.AbdelrahimElhag you have been my mentor. Your dedication to your students is quite evident and your teachings and assistance throughout my time at Sudan University for Science and Technology. Third, I would like to thank Eng. Hamid A/HameedTargouk My headmaster to allow me to work on this research during the official working hours and the use of company equipment. I would like to give a final thanks to everyone who helped me to complete this search.
