

### **DEDICATION**

To the person who proved to me that small business can successfully keep a home, warm a family and contribute to the educational fees of children. To my mother "Roqia Abu-Bakr Ahmed" who was once a small business owner.

Mohamed Elsayed Adam
April 2009

#### **ACKNOWLEDGEMENTS**

I am taking this opportunity to sincerely express my deep thanks to a number of persons who played crucial roles in supporting the research process from the early stages until the finalization of the last draft.

First of all my due respect and thanks go to my supervisor Prof. Mohamed Hassan Hafiz; who strongly supported me with his in-depth knowledge of business administration and thorough experience of research methods. I believe he was like the candle of light that shows me the way whenever I faced the darkness of scientific obstacles.

My gratitude is extended to some colleagues, lecturers and researchers; special thanks to Hassan Mohamed Ahmed (PhD)-Kassala University-Faculty of Economics, Siaf Eldeen Dawwod (PhD)-World Bank Consultant-Ministry of Finance and National Economy, Omer Ibrahim (Statistician)-Kassala University-Faculty of Economics, and Imad Eldeen Khatim-Ministry of Industry-Statistics Unit; all of them for their contributions in validating the study questionnaire and providing guidance on data analysis.

My sincere thanks also go to the team of data collectors who gathered the whole research questionnaire in a very efficient and ethical manner; not to forget one of them: Mona Mohamed Saeed, Iman Ali, Rihab El-Hibir, Safa Bakrawy and Aisha Mahmoud.

Special thanks go to Mr. Ali Adam Hassan, former Country Director-Ockenden International-Sudan for his support and encouragement. As well great thanks to my colleagues in TOKTEN Project-UNDP Sudan: Howida Elrasheed, El-nazir Mohideen and Francis Ufo for their backstopping and generous support.

I would not forget the valuable support provided by Mr. Mustafa Mohamed Elhassan-ACORD Kassala Programme Manager for availing data on small credit; and Mr. Magdi Dafalla-Practical Action Kassala Area Coordinator for generosity in providing the conference room which witnessed the orientation of the data collectors.

A word of thanks should go to a number of libraries from which I got valuable resources; and the personnel in the Investment Department and localities in Kassala State for their cheerful welcoming and availing the necessary data. Furthermore, I would like to thank the owners/mangers of the Small and Medium-sized Enterprises for disposing themselves to the interviewers despite their time limits. My gratitude is extended to Mr. Mohamed Ali Attala (George)-Head of Industrial Association in Western Kassala and Mr. Murtaja Hussein Alam-Head of Industrial Association Eastern Kassala.

I strongly believe that the support I received from those whom I mentioned and whom I forgot has significantly contributed so as this research to become a reality.

#### **ABSTRACT**

The importance of this research comes in a time when most of the developed and developing countries are moving strongly towards state policies encouraging the growth and development of the private sector and self-employment. In fact, the industrial sector in Sudan is having the potential to play a great role in the economy given the availability of different kind of inputs in the country. In Sudan 162,682 employees are working in the manufacturing establishments. Small business contributes 40% of total employment in the manufacturing establishments. Specifically in Kassala State, the reason why this research is directed towards SMEs is due the composition of the large as well as SMEs (Small & Medium Sized Enterprises) sector in the state economy. Large and medium scale industries account for 38 industries employing 4,734; while Small business alone accounts for 912 industries which employ 2,280 in the manufacturing sector.

This research investigates the impact of entrepreneurship capabilities on the growth/performance of industrial small and medium sized enterprises. Specifically the research focuses on internal and firm level capabilities represented by entrepreneurship orientation, technology, financial and human resources. The research also considers the external capabilities which are divided into two main capabilities: partnership linkages and sponsorship linkages. The third dimension of the research is entrepreneurship development macro policies including infrastructure, regulations, taxation policies and public administration of SMEs.

The research draws different arguments and perspectives in the field of entrepreneurship; this is due to the reality that this discipline is still new in Sudan. Therefore availing rich literature will help further researches in this area. The literature is supported by relevant theoretical foundations and previous studies in the domain. Descriptively, historical and contemporary data were gathered from the case study to describe the context and characteristic of Kassala state particularly the economic and infrastructure foundations. Furthermore; statistics on industrial SMEs were presented including the special characteristics of industrial establishments in Kassala state. The data was collected from a sample of 244 existing SMEs in the industrial (manufacturing) sector in Kassala state in December 2008. The sampling was limited to existing industrial SMEs registered in the database of Comprehensive Industrial Survey conducted in 2001. A stratified, systematic random sampling with proportionate allocation technique was used.

The unit of analysis in this research is the industrial establishment. The research data was analyzed using SPSS software; bivaraite, multivariate correlation analysis (Pearson's r and Spearman's rho) and cross tabulation were used in the descriptive statistical analysis. Parametric tests were adopted in analyzing the data; simple regression employed in the testing of separate research hypotheses and multiple-regression used in testing the overall research model which assumes the impact of entrepreneurship capabilities on the growth of industrial SMEs. The general research model proves significance indicating the validity of the relationship between the independent and dependent variable although some specific variable are insignificant. All the significant relationships were traced and a unique model was developed together with the findings of the research.

Despite the similarities between this research and other previous studies on entrepreneurship; the uniqueness of this research compare to other relevant researches on subject matter among small enterprises is on the following: This research represents the first scientific research on entrepreneurship on SMEs in Sudan, it takes employees' growth as indicator of business growth and performance; while most previous study focus on profitability and sales growth, and it investigates the effects of entrepreneurship development macro policies as an element ignored by most of the previous studies. The research is concluded with recommendations classified as; general recommendations, specific recommendations and recommendations for future researches. All in all the recommendations critically build on the findings of the study and made to be oriented towards improving realities, studies, R&D, and policies concerning SMEs.

#### مستخلص البحث

تأتي أهمية هذا البحث في وقت تتجه فيه معظم البلدان المتقدمة والبلدان النامية نحو سياسات تشجيع نمو وتطوير القطاع الخاص والعمل الحر والصناعات الصغيرة. القطاع الصناعي في السودان لديه الامكانية للعب دور كبير في الاقتصاد نظرا لتوافر المدخلات المختلفة. والاهم من ذلك، فإن 96.2% من الصناعات في السودان من قطاع الصناعات الصغيرة.

يساهم قطاع الصناعات في السودان بنسبة 1.7 ٪ من إجمالي العمالة بإحصائية تقدر بــ 162,682 عامل وتساهم المنشآت الصناعية الصغيرة بنسبة 40 ٪ من إجمالي هذه العمالة. في ولاية كسلا، تقدر الصناعات الصغيرة بحوالي 912 صناعة. ونسبة لهذا الدور الذي تلعبه الصناعات الصغيرة والمتوسطة دورها في الاقتصاد السوداني تم توجيه هذا البحث لدراسة هذا القطاع.

يتناول هذا البحث أثر قدرات الريادة الادارية على النمو والاداءالصناعي للمؤسسات الصغيرة والمتوسطة. ويركز البحث على وجه التحديد على القدرات الداخلية للمشروعات والمتمثل في الادارة وتحمل المخاطر، التكنولوجيا، والموراد المالية والبشرية. كما يأخذ البحث ايضا في الاعتبار القدرات الخارجية والتي تم تقسيمها الى قسمين رئيسيين: روابط الشراكة وروابط المنح والاعانات. اما المنحى الثالث لهذا البحث يتناول السياسات الكلية لتنظيم المشروعات والريادة الادارية بما في ذلك البنية التحتية والأنظمة والسياسات الضريبية والإدارة العامة للمشاريع الصغيرة والمتوسطة.

يتطرق البحث لاوجه مختلفة تتعلق بمجال الريادة الادارية وتنظيم المشروعات؛ ويرجع ذلك إلى حقيقة أن هذا المجال لايزال جديداً في السودان. وبالتالي فإن اتاحة مواد علمية سوف يساعد على المزيد من البحوث في هذا المجال. تم جمع بيانات دراسة الحالة لوصف الخصائص الاساسية لولاية كسلا خاصة الاقتصادية منها والبنية التحتية. علاوة على ذلك؛ فقد تم عرض الاحصائيات الصناعية للمؤسسات الصغيرة والمتوسطة بالاضافة للمميزات الخاصة للمنشآت الصناعية في ولاية كسلا.

تم جمع البيانات من عينة تتالف من 244 من المشروعات الصناعية الصغيرة والمتوسطة في القطاع الصناعي بولاية كسلا. اقتصرت عينات البحث على المنشأت الصناعية الصغيرة والمتوسطة القائمة والمسجلة منذ عام 2001 في قاعدة بيانات المسح الصناعي الشامل. وقد تمت المعاينة باسلوب العينات العشوائية القطاعية بتوزيع تناسبي.

تم تحليل بيانات البحث بواسطة برنامج التحليل الاحصائي للبيانات (SPSS) ،والتحليل الثنائي والمتعدد للمتغيرات، كما تم استخدام طريقة الجداول المتقاطعة في التحليل الإحصائي الوصفي. وتم توظيف طريقة الانحدار البسيط في تحليل فرضيات البحث الفردية وطريقة الانحدار المتعددة في اختبار النموذج الكلي للبحث والذي يفترض اثر الريادة الادارية على نمو المشروعات الصغيرة والمتوسطة. اثبت النموذج العام للبحث مدى اهمية العلاقة بين المتغير المستقل والتابع بالرغم من أن بعض المتغيرات ليست لها علاقة ذات دلالة احصائية. كل العلاقات ذات الدلالات الاحصائية قد تم تتبعها وتم استنتاج نموذج فريد يتماشي مع نتائج البحث.

تتّبعها وتم استنتاج نموذج فريد يتّماشي مع نتائج البحث. على الرغم من أوجه التشابه بين هذا البحث وبعض البحوث والدراسات السابقةالتي تمت خارج السودان في الموضوع قيد الدراسة؛الا ان هذا البحث قد تفرد ببعض السمات والمتمثلة في:

- ♦ يعتبر هذا البحث من اولى المحاولات لدراسةالريادةالادارية في قطاع الصناعات الصغيرة والمتوسطة في السودان.
- ♦ يختلف هذا البحث في تناوله الزيادة في عدد العاملين كمتغير لاداء ونمو المشروعات في حين ان معظم الدراسات السابقة تركز على حجم المبيعات والربحية.
- ♦ هذا البحث يتناول اثر السياسات الكلية لتنظيم المشروعات والريادة الادارية كقضية لم يتم التطرق اليها في كثير من البحوث السابقة.

وخلص البحث إلى نتائج نظرية وعملية كما استخلص توصيات تم تصنيفهاالى: توصيات عامة ، وتوصيات محددة وتوصيات للبحوث والدراسات المستقبلية.
