

List of Figures

No.	Name	Page
The Globe.....	3	(2.1)
Space Segment	5	(2.2)
Control Segment	6	(2.3)
GPS Surveying method	9	(3.1)
Determination position using 4 satellites.....	11	(3.2)
Absolute Observe.....	12	(3.3)
Relative Observe.....	13	(3.4)
Selective Availability.....	15	(3.5)
GDOP Error.....	16	(3.6)
Distribution of the points.....	17	(4.1)
How import data.....	19	(4.2)
Import raw data dialog.....	19	(4.3)
Assign dialog.....	20	(4.4)
New project dialog.....	21	(4.5)
Project window (master).....	22	(4.5)
Representation points.....	23	(4.6)
Point properties dialog.....	23	(4.7)
Control point (a1).....	24	(4.8)
Observation interval.....	25	(4.9)
Horizontal bar of reference point.....	25	(4.10)
Horizontal bar of rover points.....	26	(4.11)
Processing window.....	26	(4.12)
Geographic coordinates.....	27	(4.13)
Cartesian coordinates.....	27	(4.14)
Open new project.....	29	(4.15)
New project dialog.....	29	(4.16)
Project properties dialog.....	30	(4.17)
(4.18) Open import dialog.....	31	
Open RINX.File	31	(4.19)
DAT Checkin dialog.....	32	(4.20)
Points distribution in TGO window.....	32	(4.20)

No.	Name	Page
Open point labels dialog.....	33	(4.21)
Point labels dialog.....	33	(4.22)
The name of points on the screen.....	34	(4.23)
GPS reference point processing.....	34	(4.24)
GPS rover points processing.....	35	(4.25)
GPS baselines on the screen.....	35	(4.26)
Statistical Summary Report.....	36	(4.27)
Network Adjustment Report.....	37	(4.28)
Open RINX data file.....	38	(4.29)
GPS Occupation dialog.....	39	(4.30)
Convert file dialog.....	39	(4.31)
The points in cad view screen.....	40	(4.32)
coordinate points.....	41	(4.33)
