

ACKNOWLEDGEMENTS

I am deeply indebted to **Prof. Dr. Meawad Mohamed Elkholy**, Prof. of solid state physics, Physics Department, Faculty of Science, Menoufia University, for proposing the research problem, and providing active continuous supervision as well as experimental facilities. His sincere help, fruitful guidance, stimulating suggestions and discussions throughout this research work are highly appreciated.

I am also happy to thank **Prof. Dr. Osman Mustafa Mokhtar**, Prof. of medical Phys. Dept., Faculty of medical Radiation Science, Sudan University for Science and Technology for his supervision and valuable suggestions.

Thanks are also due to **Prof. Dr. Ahmed M. Alsoraya** Prof. of nuclear physics, and coordinator, Radiation Protection committee, College of Science, King Saud University, Riyad, for his interest and making available experimental facilities for thermoluminescence dosimetry measurements.

Thanks are also due to Head of Medical Physics Department, King Faisal special hospital and research center, and the members in the department for providing the irradiation facilities.

Finally, my deepest and **endless thanks to my wife**, for her devotion, sacrifice and sincere ness till the end of this work.
