الآيه	
Dedecation	I
Acknowledgements	II
Abstract	III
المستخلص	IV
Table of Contents	V
List of Figures	VIII
List of Tables	X
Abbreviations	XI
List of Symbols	XII
Chapter 1: Introduction	
1.1 General	1
1.2 System Identification	1
1.3 Neural Networks for Identification and Control	2
1.4 Genetic Algorithm in System Identification	3
1.5 Problem Definitions	4
1.6 Objective	4
1.7 Methodology	5
1.8 Outlines of the Thesis	5
Chapter 2: System Identification	
2.1 Introduction	6
2.2 System Identification Methods	6
2.2.1 Parametric Identification Methods	6
2.2.2 Nonparametric Identification Methods	7

2.2.2.1 Transient Analysis	8
2.2.2.2 Frequency Analysis	9
2.2.2.3 Correlation Analysis	12
2.2.2.4 Spectral Analysis	13
2.3 How System Identification is Applied	14
Chapter 3: Neural Networks for System Identification	
3.1 Introduction	16
3.2 Basic Elman Network (BEN)	17
3.2.1 Structure and Principle of Elman Network	17
3.2.2 Analysis of Elman network	19
3.3 Modified Elman Network (MEN)	21
3.4 Dynamic System Identification	23
3.5 Further Analysis of Elman Networks	23
3.5.1 Dynamic Back propagation in Elman Networks	23
3.6 Summary	25
Chapter 4: Genetic Algorithm	
4.1 General	26
4.1.1 Encoding Schemes	27
4.1.2 Fitness Evaluation	27
4.1.3 Selection	28
4.1.3.1 Roulette wheel selection methods	29
4.1.4 Crossover	30
4.1.4.1 Single point crossover	30
4.1.4.2 Multi – Point Crossover	30
4.1.4.3 Uniform Crossovers	31
4.1.5 Mutation	32

4.1.6 Termination of the Genetic Algorithm	34
4.1.7 The Simple Genetic Algorithm	34
Chapter 5: Case Studies and Simulation Results	
5.1 Basic Elman Network (BEN) Identification	37
5.1.1 Second Order Systems	37
5.1.1.1 Under damped System	37
5.1.1.2 Critical damped System	41
5.1.1.3 Over damped System	43
5.1.1.4 Non-minimum Phase System	45
5.1.2 Third Order System	47
5.2 Modified Elman Network (MEN) Identification	49
5.2.1 Second Order Systems	49
5.2.1.1 Under damped System	49
5.2.1.2 Critical damped System	51
5.2.1.3 Over damped System	52
5.2.1.4 Non-minimum Phase System	53
5.2.2 Third Order System	54
5.3 Result Summary	55
Chapter 6: Conclusion and Recommendations	
6.1 Conclusion	57
6.2 Recommendations	58
References	59
