

## **Dedication**

**To my very extended family I dedicate this effort.**

## **Acknowledgement**

I feel very grateful to thank all who made it possible for me to complete this research. First of all my sincere gratitude is dedicated to my supervisor professor Ahmed Ibrahem Abu Sin for his support, guidance, and comments through the process of completing the thesis.

Also my thanks is extended to El Fasher University for providing me the opportunity.

My thanks is also addressed to Abdelmaula Abdelmageed for his assistance in analyzing the questionnaire, and also to those who answered the questionnaire.

Special thanks are due to my wife for her continuous support and encouragement throughout.

## **Abstract**

Financing is the most acute problem facing small-scale industries across countries. Although this sector contributes to various national economies but generally they are facing many problems such as shortage of capital; collateral required; infrastructural facilities; training; and many other problems.

The main objectives of this study are to investigate the impact of managerial policies on financing small-scale industries in Sudan; to clarify the concept of managerial policies and their formulation; to acquaint with small-scale industries; to figure out problems facing their development; to find out support and efforts exerted by the government to solve their problems; to expose experiences of some developed and developing countries in financing and supporting small-scale industries; and to search the best methods for developing these industries.

To realize these objectives the researcher has designed two sets of questionnaires, one address entrepreneurs of small-scale industries and incorporates 36 questions, and the other one addresses managers of investment sections in various banks in Khartoum State and consists of seven questions.

The State has been divided into three geographical areas; these are Khartoum, Khartoum North, and Omdurman.

Seven types of small industries have been chosen randomly, these are oil pressing, engineering workshops, soap industries, carpentry, leather products, shoemaking, and plastic.

A sample of 153 small industrial units was selected and a stratified random sample method was utilized. For collecting data from financial institutions (Banks) 15 banks were selected purposively .

The results of the study showed that:-

- There is no one consensus definition of small-scale industries throughout the world.
- Also they showed that small-scale industries in developed and developing countries have played great role in providing employment opportunities; generating Income; and regional development.
- Small-scale industries in most developing countries operate within the informal sector; because of this it became problematic for the financial institutions to provide them with the required credit facilities.
- Many of the small—scale industries faced problems related to policy and administrative actions.
- The study also shows that the geographical distribution of the industrial establishments in Sudan is uneven.
- The study found that the managerial policies of Bank of Sudan in terms of credit policy did not recognize small-scale industries.
- Unavailability of financing, poor technology, transportation, and high taxation are the most chronic problems facing small-scale industries.
- Entrepreneurs did not obtain loans at the beginning of their operations; they relied completely on their own sources.
- The study shows that banks are not keen to finance small-scale industries sector; they charged high interest rates and required unaffordable collaterals which are beyond the capacity of most entrepreneurs.
- The study reveals that Ministry of Industry has no effective managerial policy assisting small-scale industries.
- It also shows that the present credit policies are insufficient and need effective reforms.
- And finally it reveals that the Sudanese investment acts have never provided entrepreneurs of small-scale industries with privileges, or facilities, or even guarantees.

The study recommended that:-

- 1- Government of Sudan should encourage formal credit institutions to finance the sector by taking the following step:-
  - Initiation of credit guarantees schemes for small entrepreneurs.
- 2- In order to foster development of small-scale industries, government should adopt a more comprehensive policy pertaining to this sector. Also it must strive to develop innovative credit programs suitable for the needs of small-scale industries entrepreneurs.
- 3- Government should indorse special legislations for small-scale industries.
- 4- Government should revise tax structure so as to provide some protections to small industries.
- 5- The Ministry of Industry must take a policy for the development of small-scale industries.
- 6- Bank of Sudan should be keen to issue policies that are favorable to small industries and must direct all financial institutions to provide the sector with the required financing.

## ملخص البحث

تواجه الصناعات الصغيرة في كل دول العالم مشكلة التمويل بالرغم من أنها تسهم في الاقتصادات القومية، فهي تواجه مشكلات قلة رأس المال، الضمانات، البنية التحتية، التدريب ومشكلات أخرى.

من أهم أهداف هذه الدراسة التحقق من أثر السياسات الإدارية على تمويل الصناعات الصغيرة في السودان، وأيضاً تهدف الدراسة إلى توضيح مفهوم السياسات الإدارية وكيفية بنائها، وكذلك التعرف على الصناعات الصغيرة، بالإضافة لمعرفة المشكلات التي تواجه تنمية هذا القطاع في السودان. كما تهدف الدراسة أيضاً لصياغة تجذب بعض الدول في دعم وتمويل الصناعات الصغيرة. وأخيراً تهدف الدراسة إلى إيجاد طرق لتنمية هذه الصناعات.

لتحقيق هذه الأهداف، قام الباحث بتصميم لستة برتوكولين، واحدة تختص بأصحاب الصناعات الصغيرة، والأخرى تختص بدراسة أنواع الصناعات الصغيرة وأشكال الاستثمار بالبنوك.

تم تقسيم ولاية الخرطوم إلى ثلاثة مناطق جغرافية هي الخرطوم، الخرطوم بحري، وأم درمان.

تم اختيار سبعة أنواع من الصناعات الصغيرة وهي معمل صناعة الزيوت، الووش الهننسية، مصانع الصابون، التجارة، المنتجات الجلدية، صناعة الأحذية، والبلاستيك.

تم اختيار عدد 153 وحدة صناعية بمثابة العينة. وقد تم استخدام العينة الطبقية العشوائية لجمع المعلومات. بالإضافة لهذا ولجمع المعلومات من المؤسسات المالية تم اختيار عدد 15 بنك عامل في ولاية الخرطوم.

### نتائج الدراسة أظهرت:

- عدم وجود تعرف موحد للصناعات الصغيرة، إذ تلعب هذه الصناعات الصغيرة دوراً كبيراً في الدول النامية والمتعلقة في إيجاد فرص للعمل، وتوليد الدخل، كما تسهم في التنمية الإقليمية.
  - أظهرت الدراسة أيضاً أن معظم قطاع الصناعات الصغيرة في الدول النامية تعطى في القطاع غير الرسمي.
  - كما أظهرت الدراسة أن الصناعات الصغيرة تواجه مشكلات تتعلق بالسياسات والأعمال الإدارية.
  - أظهرت الدراسة كذلك أن السياسات التمويلية لبنك السودان قد ألغفت قطاع الصناعات الصغيرة.
  - كذلك أظهرت الدراسة أن قلة التمويل، النقل، الصرائب والتكنولوجيا هي من المشكلات الضرورية التي تواجه الصناعات الصغيرة.
  - أظهرت الدراسة أيضاً أن أصحاب الصناعات الصغيرة لا يجدون القروض عند بداية أعمالهم، لذلك يعتمدون بالكامل على مصادرهم الذاتية.
  - أظهرت الدراسة أن البنوك غير راغبة في تمويل الصناعات الصغيرة، وعادة ما يطلبون ضمانات غير مقدور عليها.
  - كما أظهرت الدراسة أن وزارة الصناعة ليست لديها سياسات فعالة تساعد الصناعات الصغيرة.
  - وأخيراً أظهرت الدراسة أن السياسات التمويلية الحالية غير كافية وتحتاج إلى إصلاح.
- أوصت الدراسة بالآتي:

- يجب على حكومة السودان ولتمويل الصناعات الصغيرة أن تحت المؤسسات المالية على تمويل هذا القطاع وذلك بتبني هذه الخطوة:
- 1. إنشاء صندوق الضمان الائتماني، وذلك لتقديم الضمانات لأصحاب الصناعات الصغيرة.
- كذلك أوصت الدراسة بأن على حكومة السودان ومن أجل تسريع تنمية هذه الصناعات يجب عليها تبني سلسلة شاملة خلصة بهذا القطاع.
- أوصت الدراسة أيضاً بأن على حكومة السودان إصدار تشريعات خلصة بالصناعات الصغيرة.
- أوصت الدراسة بضرورة مراجعة الضرائب لحماية هذه الصناعات.
- وأخيراً أوصت الدراسة بضرورة إصدار سلسلة تمويلية من قبل يثبت السودان تزويده فيها ظرف هذه الصناعات الصغيرة، وعلى بذلك السودان توجيه كل المؤسسات المالية لتوفير التمويل اللازم لهذه الصناعات.
