ACKNOWLEDGMENT

I owed many people a great debt for their commitment & encouragement which enable me to create this research. My deepest thanks to them all. Special thanks to my supervisor Dr. Ahemed Hassan Elshikh for his great help.

My thanks are extended to the Ministry of health, Khartoum state primary health care department, occupational health department & the staff of the mills which the measurements were done in it.

Also grateful thanks to Dr. Esam Abkar & Eng. Adel Ebrahim.

Also my thanks to my teachers & every one who supports me.

DEDICATION

ABSTRACT

The proposed project focuses on the investigations on the hazards in textile enterprises namely causes & remedies.

Kinds of the hazards & Factors affecting the level were studied in three factories, two of them for weaving & the third one for spinning.

Periodical medical examinations show that occupational diseases have remarkable presence in the chosen mills due to the low level of maintaining healthy environmental working atmosphere.

Factors are attributed to Lack of training & awareness for the worker, knowledge about the human right, personal protection equipment, inadequate ventilation & other things. The findings showed carelessness in the human health.

Results are tabulated & expressed graphically; remedies are suggested to keep the control of hazards in reasonable minimum proportions.

الخلاصه

الخلاصه

اجريت دراسة هذا البحث لمعرفة مخاطر صناعة النسيج واسبابها وطرق علاجها. وايضا انواع المخاطر والعوامل المؤثرة في ارتفاع مستوي الخطر حيث تمت الدراسة على ثلاثة مصانع على سبيل المثال اثنان متخصصين في صناعة النسيج والاخر في الغزل .

اثبتت الفحوصات الطبية التي اجريت من قبل فريق الصحة المهنية ارتفاع الامراض المهنية في تلك المصانع وكان ذلك مؤشرا واضحا لتدني بيئة العمل . وقد رجحت نتائج الاختبارات اسباب ذلك التدني الي عدم توفير الوعي والتدريب الكافي لدي العاملين بمخاطر مهنتهم ، وعدم المعرفة بحقوق الانسان ، عدم وجود وسائل الحماية الشخصية والتهوية السيئة واسباب اخري كثيرة . تم رصد وتوضيح كل النتائج في جداول ومخططات ملحقه بالبحث .
