Verse.....	
Dedication.....	i
Acknowledgmen.....	ii
Abstract.....	iii
Table of contents.....	iii
List of figures.....	v
List of tables.....	vi
CHAPTER ONE: Introduction.....	1
 CHAPTER TWO: History of Maps.....	 3
2.1 Introduction.....	3
2.2 History of maps.....	3
2.2.1 The first maps.....	3
2.2.2 The middle ages.....	5
2.2.3 The first modern atlas.....	5
2.2.4 The Mercator atlas.....	6
2.3 Tools for mapmakers and navigators.....	6
2.3.1 Compasses.....	7
2.3.2 Astrolabes.....	7
2.3.3 Sextants.....	7
2.3.4 Chronometers.....	8
2.4 Mapping in Sudan.....	9
 CHAPTER THREE: The Map Datum.....	 11
3.1 General introduction.....	11
3.2 Practical way to define a datum.....	12
3.3 Why and how datums happen.....	14
3.4 Multiple datums confusion and error.....	15
3.5 Example of international and local datum.....	16
3.5.1 World geodetic system 1984.....	16
3.5.1.1 Breif description.....	16
3.5.1.2 Deffinition of frame.....	16
3.5.1.3 Cordinate systems.....	17
3.5.1.4 Deffing parameters.....	18
3.5.2 Adindan.....	18
 CHAPTER FOUR: The Map Projections.....	 20

Figure	Title	Page
4.1	Introduction.....	20
4.2	Types of projections.....	22
4.2.1	Azimuthal or zenithal projections.....	22
4.2.2	Conical projections.....	25
4.2.2.1	The simple conic projection with one standard parallel.....	26
4.2.2.2	The conical with two parallels.....	26
4.2.3	Cylindrical projections.....	27
4.2.3.1	The simple cylindrical projection or plate carree.....	29
4.2.3.2	The transverse cylindrical or Cassini's projection.....	29
4.2.3.3	The cylindrical equal-area projection.....	30
4.2.3.4	The cylindrical equal-area projection with two standards Parallels.....	30
4.2.3.5	The Mercator's projection.....	30
4.2.3.6	The oblique Mercator projection.....	32
4.2.3.7	The transverse mercatorr projection.....	32
4.3	Universal transverse Mercator (UTM).....	33
4.4	The scale factor.....	38
CHAPTER FIVE :Tests and Results		40
5.1	Introduction.....	40
5.2	Test number one.....	41
5.3	Test number two.....	43
5.3	Test number three.....	45
CHPTER SIX: Conclusions and Recommendations.....		48
6.1	Conclusions.....	48
6.2	Recommendations.....	48

List of figures

Figure (3.1) Different ellipsoids from fitting different regions of earth.....	14
Figure(3.2) Control points in two datum	15
Figure(4.1) Azimuthal projection	23
Figure(4.2) Projection lines of gnomonic, stereographic and orthographic....	24
Figure(4.3) Gnomonic, stereographic and orthographic.....	24
Figure(4.4) The simple conic projection with one standard parallel.....	26
Figure(4.5) The simple conic projection.....	26
Figure(4.6) The conical with two standard parallels.....	27
Figure(4.7) Cylindrical projection.....	28
Figure(4.8) UTM zones and bands.....	36
Figure(5.1) Test number one ratio between difference in distance with distance.....	43
Figure(5.2) Test number two ratio between difference in distance with distance.....	45
Figure(5.3) Test number three ratio between difference in distance with distance.....	47

List of Table

Table (3.1) Number of datum on some popular ellipsoids.....	13
Table (3.2) WGS84 parameters.....	18
Table (5.1) Original map information.....	40
Table (5.2) Test criteria.....	41
Table (5.3) Test number one relationship between distance in (km) onWGS84-UTM and Clarke1880-TM.....	41
Table (5.4) Test number one relationship between difference in distance against distance.....	42
Table (5.5) Test number two relationship between distance in (km) onWGS84-TM and Clarke1880-TM.....	43
Table (5.6) Test number two relationship between difference in distance against distance.....	44
Table (5.7) Test number three relationship between distance in (km) onWGS84-UTM and Clarke1880-UTM.....	46
Table (5.8) Test number three relationship between difference in distance against distance.....	47
