

Table of Contents

DEDICATION	I
ACKNOWLEDGEMENTS.....	II
ABSTRACT.....	III
المستخلص.....	IV
CONTENTS.....	V
LIST OF FIGURES.....	VIII
LIST OF TABLES	IX
 CHAPTER ONE	 1
1. INTRODUCTION.....	1
1.1 General Overview.....	1
1.2 The Problem Statement.....	4
1.3 Proposed Solution.....	4
1.4 Objectives.....	4
1.5 Scope.....	5
1.6 Methodology.....	5
1.6.1 Phase One	5
1.6.1 Phase Two.....	5
1.6.1 Phase Three.....	6
1.7 Simulation Tools	6
1.8 Thesis Organization	6
 CHAPTER TWO	 8
2. LITERATURE REVIEW.	8
2.1 General Overview.....	8
2.2 Real Time Measurements of Glucose Concentration using Position Sensing Detection	8
2.3 Continous Noninvasive Glucose Monitoring Technology based on "Occlusion Spectroscopy"	10
2.4 Non Invasive Blood Glucose Measurement using NIR technique based on occlusion spectroscopy	11
2.5 A Feasibility Study on Noninvasive Blood Glucose Measurement Using Photo-acoustic Method.....	12

2.6	Noninvasive Glucose Monitoring: A Novel Approach	13
2.7	Joint optical-electrical technique for noninvasive glucose monitoring	14
CHAPTER THREE.....		17
3.	Scientific Approach	17
3.1	Light-Tissue Interaction.....	17
3.2	Scattering Spectroscopy.....	19
3.2.1	Mie Scattering.....	21
3.2.2	Rayleigh Scattering	22
3.2.3	Relation between scattering angle and glucose concentration	23
3.3	Photo-Acoustic Spectroscopy.....	24
3.4	Glucose Measurement Approach	28
3.4.1	Absorbion Coefficient	28
3.4.2	Scattering Spectroscopy Approach	29
3.4.3	Photo-Acoustic Spectrosocopy Approach.....	30
3.5	Experiment Evaluation.....	31
CHAPTER FOUR.....		33
4.	PROTOTYPE DESIGN.....	33
4.1	Design Overview	33
4.2	The Laser System	34
4.2.1	Laser Source Specification	34
4.2.2	The laser Cell Design	35
4.3	The Processor	36
4.3.1	Microcontroller Structure	37
4.3.2	Families of Microcontroller	40
4.4	System 1: The Scattering Spectroscopy Circuit	42
4.4.1	Data Acquisition	42
4.4.2	Signal Preprocessing	43
4.4.3	Signal Processing	45
4.5	System 2: The Photo-Acoustic Spectroscopy Circuit.....	45
4.5.1	Data Acquisition	45

4.5.2	Signal Preprocessing	44
4.5.3	Signal Processing	46
4.6	Software Algorithm	46
CHAPTER FIVE.....		49
5.	RESULTS AND DISCUSSION	49
5.1	Results Overview.....	49
5.2	Glucose Measurements	50
5.3	The Final Joint Result Using Measures of Central Tendency.....	52
5.3	Comparison of prototype results with reviewed devices	55
CHAPTER SIX.....		57
6.	CONCLUSION AND RECOMMENDATIONS.....	57
6.1	Conclusion.....	57
6.2	Recommendations.....	57
REFERENCES.....		59
APPENDIX A		
APPENDIX B		
APPENDIX C		
APPENDIX D		

List of Figures

Figure 1.1 :	Light interaction with a tissue sample.....	3
Figure 2.1:	The optical metrology system.....	9
Figure 2.2:	The linear relationship between the refractive index and the glucose concentration.....	9
Figure 2.3:	Occlusion effect on the acquired signal.....	10
Figure 2.4:	Clarke Error Grid Analysis for Orsense device.....	11
Figure 2.5:	The PAS system design.....	13
Figure 2.6:	The two systems design is described; (a) Electrical impedance spectroscopy and (b) Near Infrared spectroscopy.....	15
Figure 2.7:	The EGA of the joint result of glucose concentration.....	16
Figure 3.1:	The change in scattering angle due to the change in glucose concentration.....	24
Figure 3.2:	Methods of generating PA signal.....	25
Figure 3.3:	Clarke Error Grid analysis, where region A represents clinically accurate measurements, region B represents clinically acceptable measurements and regions C, D and E represent misinterpreted measurements.....	32
Figure 4.1:	The Block Diagram of the prototype design.....	33
Figure 4.2:	The dimensions of the laser cell.....	36
Figure 4.3:	The configuration of the laser cell.....	36
Figure 4.4:	Microcontroller structure.....	37
Figure 4.5:	The configuration of the photodiodes array elements with the incident laser beam.....	43
Figure 4.6:	The preprocessing circuit diagram for the scattering spectroscopy system.....	44
Figure 4.7:	Temperature sensing circuit.....	44
Figure 4.8:	The omnidirectional microphone dimensions.....	45
Figure 4.9:	The preprocessing circuit for the Photo-acoustic spectroscopy system.....	46
Figure 4.10:	The Software Algorithm.....	48
Figure 5.1:	EGA for Glucose concentration measurements based on the Rayleigh Scattering Theory.....	51
Figure 5.2:	The EGA for glucose concentration measurements based on the linear equation between glucose concentration and scattering angle	51
Figure 5.3:	The EGA for glucose concentration based on Photo-acoustic Spectroscopy.....	52
Figure 5.4:	The EGA of the mean values of glucose concentrations.....	53
Figure 5.5:	The EGA of the median of glucose concentrations.....	53
Figure 5.6:	The EGA of the mode of glucose concentrations.....	54

List of Tables

Table 2.1:	The change in frequencies in the subjects with diabetes Type II, low BP, high BP, low hemoglobin, and healthy condition (before occlusion and after occlusion).....	12
Table 5.1:	The range of blood glucose measurements for each measuring technique.....	48
Table 5.2:	The glucose measurements evaluation result using EGA and the value of MSE.....	53
Table 5.3:	the percentage of measurements falling into region A and B (clinically acceptable), and the reference measuring device used to evaluate each device.....	56
