

Table of Contents

Chapter One:

(1.1) Introduction		2
Table (1.1) Manufacturing Process	3	
Table (1.2) Hide & Skin production production (,000) 1992-2001	5	
Table (1.3) Animal population in Sudan (,000) (1990/1991)	6	
Table (1.4) Results of parameters analysis from soba – treatment plan (2001)	7	
Table (1.5) Results from soba sewage plant (Average) year 2002	8	
Table (1.6) Results Khartoum- Tannery for waste water year 2001	9	
Table (1.7) Results from soba sewage plant (Average) year 2003	10	
Table (1.8) Average pollution load from 5 tanneries in Yugoslavia -1983	11	
Table (1.9) Allowed targets loads in some countries	12	
Table (1.10) Prescriptions for discharging in France & Yugoslavia	12	
Table (1.11) Prescriptions for discharging tannery effluent in Sudan	13	

Chapter Two: Literature Review

2-1 Hides and skins	15	
2-1-1 Chemistry of hides and skins	15	
2-1-1-1 Chemical constituents		15
Figure 2-2 Anatomical structure of hides & skins	17	
2-2 Preservation of hides and skins	20	
2-2-1 Wet salting		20
2-2-2 Brining	21	
2-2-3 Dry salting		21
2-2-4 Air drying		21
2-2-5 short – term curing	23	
2-2-5-1 Cooling and light refrigeration	23	
2-2-5-2 Treatment with antiseptics	24	
2-3 Hides and skins defects	24	
2-3-1-1 Damages caused during animal life	24	

2-3-1-2 Damages caused by insects	25	
2-3-1-3 Brand marks	26	
2-3-2 Damages caused during flaying	26	
2-3-2 Damages caused during preserving and storing.	26	
2-4 Pre- Tanning Process	27	
2-4-1 Soaking	27	
2-4-2 Unhairing and liming	29	
2-4-2-1 Sweating		31
2-4-2-2 Enzyme unhairing	30	
2-4-2-3 Paint Unhairing	31	
2-4-2-4 Oxidation unhairing	32	
2-4-3 Liming	32	
2-4-3-1 Pit liming system	33	
2-4-3-2 Drum unhairing and liming	34	
2-4-3-3 Paddle unhairing and liming	35	
2-4-3-4 No Lime systems	35	
2-4-3-5 Straight lime liquors	35	
2-4-4 Recycling of lime sulphide unhairing liquors	36	

Chapter Three: Materials and Methods

3-1 Raw materials		41
3-2 Experimental works		41
3-2-1 Soaking	42	
3-2-2 Unhairing and liming	42	
3-3 Method of sulphide determination	45	
3-4 Method of determination of calcium	46	
3-5 Chemical analysis		48
3-5-1 Sampling location for skins	48	
3-5-2 Preparation of sample	48	
3-5-3 Determination of moisture	48	
3-5-4 Determination ash content	49	
3-5-5 Determination of fat content. Hl N2 Analysis	49	
3-5-6 Determination of skin substance by total kjeldahl nitrogen	50	
3-6 Physical analysis		51

3-6-1 Preparation of sample	52
3-6-2 Measurement of thickness	53
3-6-3 Measurement of tensile strength and % of elongation	53
3-6-4 Measurement of distension and strength of grain by ball burst test	54

Chapter Four: Results and discussions 56

Table (4.1) Chemical analysis of fresh & used liquors – Calculation	61
Table (4.2) Comparison of % Chemicals and water	62
Table (4.3) Amounts of sodium sulphide and calcium	63
Table (4.4) Degree of swelling and efficiency of unhairing.	64
Table (4.5) Amount of Na ₂ S and lime added to spent liquors and pHs	65
Table (4.6) Chemical analysis of leathers.	66
Table (4.7) Conventional unhairing compared to recycling methods.	67
Table (4.8) Physical properties of leather	68
