

Dependence on the cruise style extracted from elements of a major nature which appears in the movement of the waves of the sea and the sand dunes shape

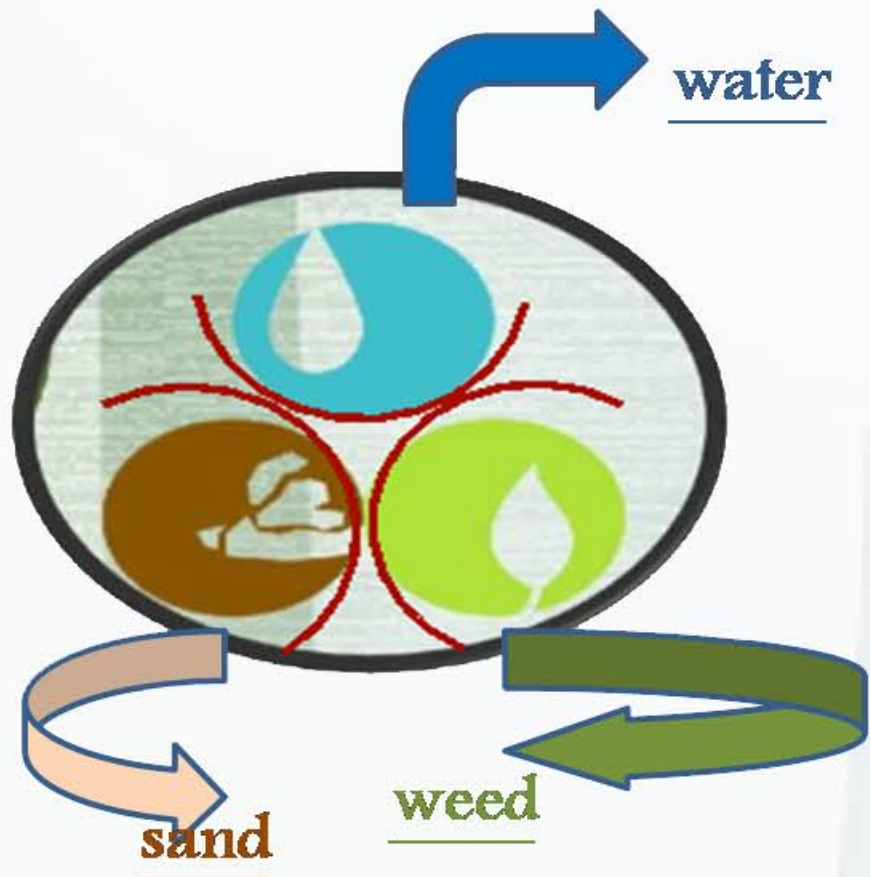

CONSEPT

Has been taking into account the main elements of nature (water - weeds - sand) when planning for each element and mention every element with signal circuit formed three circles, through this three circles configured three main axes of motion of each axis surrounded Department

Thus, combining with cruise style & three elements consisting of the basic nature Project planned and created major traffic corridors and access to form a design of the basic block
